

Mora traventeno

Mora traventino

is a ready to use cementitious Colored render, it is High bonding thin layer for all kind of concrete surfaces with variety finishing, can be used internal and external and no need any primers. Mora traventino produces with wide range of colours for further customer satisfaction.

- The surface should be clean and free from dust, paint and all loose particles. Dampen the surface before application.
- Mix the material with the same quantity of clean water for each mix to avoid shading.
- Apply first coat of the mix on a dampened substrate then wait to dry.
- Apply second coat on average total thickness of 3.0 mm by trowel or spraying machine.
- Carefully level and smooth the render, and then make the finishing as per the desired look.
- After finishing, apply mora coat 200 to protect the surface.
- Do not apply the material if rain predicted.

Storage

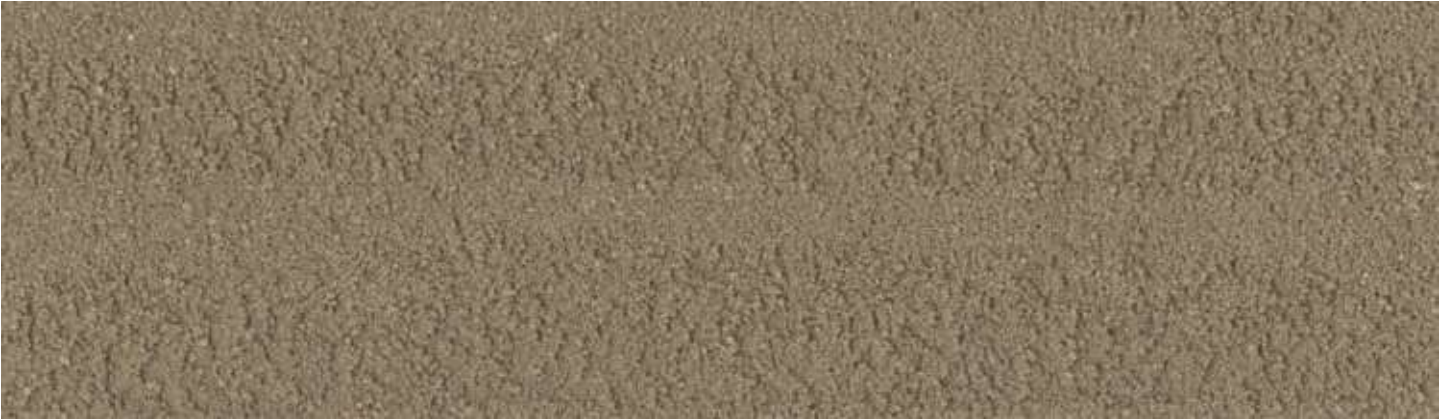

12 month in dry place
